DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 11 and 14, drawn to a rubber blend composition wherein rubber material A consists of NR or a mixture of NR and SBR, and rubber material B consists of maleic acid-modified EPM, CSM, CPE, FR or acrylic rubber.

Group II, claim 12, drawn to a rubber blend composition wherein rubber material A consists of a mixture of NR and BR, and rubber material B consists of halogenated IIR (*sic*), maleic acid-modified EPM, CR, carboxyl-modified NBR, CSM, CPE, FR or acrylic rubber.

Group III, claim 13, drawn to a rubber blend composition wherein said rubber material A consists of NR, while said rubber material B consists of halogenated IIR (*sic*).

Group IV, claim 15, drawn to a rubber blend composition wherein said rubber material A is a natural rubber, while said rubber material B is an acrylic rubber.

Group V, claims 16-19 and 21-25, drawn to a process for dynamic vulcanization.

Group VI, claim 20, drawn to a process for dynamic vulcanization.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Each of Groups I-III are drawn to compositions that differ in content, and, as such, physical characteristics associated with each different constituent. Groups V and VI are drawn to processes that differ in manner of execution. The processes of Groups V and VI are not drawn to the production of either composition of Groups I-III, and may be used to make other products by dynamic vulcanization using other elastomeric/rubber components. The

several Groups, as listed, fail to claim the same or corresponding special technical features. The inventions are not disclosed as being capable of use together and possess different characteristics which have different functions and effects, as well as have different modes of operation. The groupings of claims which would be acceptable to provide a Unity of Invention are those as set out in 37 CFR 1.475(b). Note MPEP 1875.01 in this regard.

Due to the complexity of the restriction requirement a telephone call was not made to request an oral election to the requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nathan M. Nutter whose telephone number is 571-272-1076. The examiner can normally be reached on Monday-Friday 9:30 am to 6:00 pm.
